

## Five implementation models for National LMS

Access to national content	Access to local content	OLM implementation needed	Manager Self Service Implementation needed	Courses approved locally before enrolment	Steps to implementation
<b>1. Elearning only (National content).</b> Enables staff to self enrol and play courses in the National LMS course catalogue. National courses are centrally set to 'self enrol'. Organisations can decide to use local content at a later date.					
✓	If required refer to model 2	✗	✗	N/A	1. Set up users 2. PC checks/setup 3. IT Firewall check 4. Give users login details
<b>2. Elearning only (National and/or local content).</b> Local courses must be <b>self enrol only</b> .					
✓	✓	✓ Administrator sets up & maintains local content in course catalogue.	✗	✗	Steps 1-3 4. Add local courses to OLM catalogue 5. Give users login details
<b>3. Full Learning Management (without Self Service HR).</b> Enables staff to manage all their training (including classroom based training) online and complete elearning without rolling out full self service functionality.					
✓	✓	✓	✗	✗	Steps 1-3 4. Implement OLM 5. Give users login details
<b>4. Full Self Service and elearning (without Learning Management).</b>					
✓	✓	✓ If local content used	✓	✓	Steps 1-3 4. Add local courses to OLM catalogue (if appropriate) 5. Implement Employee and Manager Self Service 6. Give users login details
<b>5. Full Self Service with Learning Management and elearning.</b> This is the widest deployment of all functionality.					
✓	✓	✓	✓	✓	Steps 1-3 4. Add local courses to Implement OLM 5. Add local courses to OLM catalogue 6. Implement Employee and Manager Self Service 7. Give users login details

### Additional comments:

- Remote access can be used with or without Self Service implemented.
- All options provide learner progress tracking and reporting.
